Laptop Internet access without wires

No networking knowledge required

# Symphony Cordless Modem

*Simple, Reliable Home and Small Office  
Computer Networking Without Wires*

## No Wires Needed—Network Computers Cordlessly

Connect your computers together without wires! Eliminate the hassle of opening up walls, climbing through your attic or stringing cables across the floor. With the Symphony Cordless

Networking Suite you can network your desktop and laptop computers together, no matter where they are in your home or office. With a 150 foot

range, Symphony covers most homes and small offices. And, because it is cordless, you can place your computers wherever you need them—not tied to a phone jack.

## No Networking Knowledge Required

Symphony Composer™ installation wizard takes the entire hassle out of setting up your cordless network. From start to finish Symphony Composer™ guides you through the installation—setting up Internet

sharing, printer sharing and file sharing for you. And, adding additional computers is easy.

## Save Money, Save Time— Share One Internet Connection Simultaneously

You've probably experienced the conflict of multiple people trying to get on the Internet at the same time—Dad wants to check stock prices, Mom wants to research the family vacation and Junior wants to get online and chat. End these Internet access frustrations with Symphony.

The included Symphony Conductor™ application lets multiple people share one ISP account through the Symphony Cordless Modem. You and your family can explore different websites at the same time for the cost of only one ISP connection.

## Laptop Internet Access without Cables

Road warriors used to being chained down when accessing the Internet with a laptop will appreciate the freedom provided by the Symphony Cordless Modem. Check email while eating breakfast. Research a customer's website from the couch. Remain connected poolside while watching the kids swim. All without cables dragging behind your notebook.

## Features

- Stand-alone device
- Simultaneous multi-user ISP sharing
- 56 Kbps connections\*

## Benefits

- Does not require a dedicated PC
- High speed Internet access with one account
- The fastest Internet speeds over a single phone line

## Members of the Symphony Cordless Family

With Symphony Cordless Networking products, you and your family can start enjoying fast, shared Internet connections, saving money by sharing printers, and having fun playing networked computer games—without wires!

Using only one phone line and one ISP account, Symphony lets you explore different Internet sites from multiple computers at the same time. Access printers, drives, folders, and files from any computer on your cordless network. Share your existing modem or use the Symphony Cordless Modem for the ultimate cordless Internet access. Attach the Symphony Cordless Ethernet Bridge to an existing Ethernet network or a high-speed Internet access device like an ISDN router, xDSL modem, or Cable modem for the most flexible home and small office solution available.

#### Cordless ISA Card

For desktop PCs with an available ISA slot.

#### Cordless PCI Card

For desktop PCs with an available PCI slot.

#### Cordless PC Card

For laptop computer users with a PC Card Type II slot.

#### Cordless Ethernet Bridge

Connect Symphony-enabled computers to an existing Ethernet LAN or Internet connection via an ISDN router, xDSL modem, or Cable modem.
